Jas. Boss Filled Watch Cases

The United States Boundaary.

States is marked by stone cairns, iron

pilars, wood pillars, earth mounds and

timber posts. A stone cairn is seven and balf feet by eighteen feet, an earth

ound is seven feet by fourteen feet,an

ron pillar eight feet high, eight inches

quare at the botton and four at the top.

ember posts five feet high and eight

in hes n u ire. Between the Lake of the

Read River valley is marked by cast-iorn

pillars at mile intervals. The British

place one every two miles, and the

United States one between each two

British poets. Our markers were made

at Detroit, Michigan. They are hollow

iron castings, three eights of an inch in

thickness, in the form of a pyramid. They

have at the top a solid pyramidal cap,

and at the bottom an octagon flung one

inch in thickness. Upon opposite faces

are cast, in letters two inches high, the

mecuption "Convention of London,"

and "October 20th, 1815." The inscrip-

tions begin about four feet six inches

above the base and read upwards. The

boles cast in the pillars for the purpose

The pillar when completed weighs

eighty five pounds. The pillars are all

set four feet in the ground, with their

inscriptions facing to the north and

seasoned logs are selected, and the por-

tion above the ground is painted red,

to prevent swelling and shrinking. Noth-

ing but iron will last very long, as the

Indians cut down the wooden ones for

tud. Where the line crosses laker,

mounds of stone have been built, the

eight feet from the lake's surface at high

water mark. In forests, the line is

marked by felling the timber a rod wids

and cleaning away the underbrush. The

work of cutting through the timbered

swamps was very great, but it has been
